Chief of Station, Kaiserau

Foreign Division M

Railroad Shipments of Material Within Wismut Complex

Reference: [redacted]-31459

Remarks

1. The information given by Source regarding the shipment of ore to Object 32 in Czechoslovakia is most interesting. Source states that ores and ores being shipped from Object 9 to Object 32 during the period 25 April to 25 May 1951. According to previous information, Object 9 was closed in August 1950 and all workable shafts were taken over by Object 9 at that time. Also, we have had no information on Object 32, which, according to Source, has been shipping ore to Object 32 since mid 1949. We have concluded that Object 32 had been incorporated in other objects in the area. If possible, it is desired that Source be queried regarding these discrepancies.

2. According to the source of the information, approximately 110 carloads of ore were shipped to Object 32 within the 30 day period between 25 April and 25 May. This means approximately 3,600 tons per month or 36,000 tons per year. This is considerably less than previous information on the capacity of the plant at Object 32 would indicate. It is possible that the shipments reported by the source are not all the ore shipments being received by Object 32. It is suggested that Source be queried regarding the capacity of Object 32 and the exact location of the Object. Is Object 32 located in Langenhain?

3. In reply please refer to [redacted]-1097.
